Software

Existe algum programa grátis "cross-platform" para leitura e agregação de "feeds" nos formatos RSS, Atom e RDF ?

Existem vários, quer dedicados / independentes (RSSOwl), quer integrados noutros programas (p.ex. no Thunderbird e no Firefox).

RSSOwl
Descrição: Existe em versões para MS Windows, Mac OS/nbsp;X e GNU / Linux).
RSSOwl is a powerful and free software to gather, organize and search news in RSS, Atom and RDF formats. It is written entirely in the Java programming language and uses the platform independent SWT toolkit for its graphical user interface. RSSOwl lets you gather, organize and search news in RSS, Atom and RDF formats. It is written entirely in the Java programming language and uses the platform independent SWT toolkit for its graphical user interface. RSSOwl lets you gather, organize and search news in RSS, Atom and RDF formats. It is written entirely in the Java programming language and uses the platform independent SWT toolkit for its graphical user interface. RSSOwl lets you gather, organize and search news in RSS, Atom and RDF formats. It is written entirely in the Java programming language and uses the platform independent SWT toolkit for sharing, and much more. It's easy to configure and the best of all, it's free!
Nota: Tem um motor de pesquisa integrado, utiliza keyword feeds, lê diversos formatos (RSS, Atom e RDF); permite pastas coloridas, gravação de pesquisas, partilha de feeds, etc.
Aplicação: **RSSOwl**
